Health Care Action Group  
April 23, 2013, 12:30—2:00pm Eastern Time  
Dial-in number: 877-939-9724, passcode: 3833060**

**Objective:**

- Review and provide feedback on patient guide to sexual health care services

**Agenda and Discussion Guide:**

- 12:30 pm**                      **Overview of the guide**
- Purpose, audience, core content

- 12:40 pm**                      **General feedback**
- Does the guide cover all the essential core content?
  - Is it appropriate in tone? Is it consistent with a positive, sexual health promotion approach?
  - Is the guide clear and easy to understand?
  - Is the length of the document and language used appropriate?
  - Is it persuasive? Will it motivate patients to seek sexual health care services?

- 1:10 pm**                      **Specific questions**
- *In the achieving sexual health section:* do you believe this language will speak equally to men and women? Will it speak to adults across the lifespan?
  - *In the recommended services section:* Current text reflects CDC recommendations. Should we work off the CDC or USPSTF recommendations? What about places where the two do not align?
  - How should we handle the issue of adolescent confidentiality and EOBs? Should we comment on this topic at all?
  - *In the talking with your provider section:* are the sample questions appropriate and realistic? Are there additional commonly asked questions that should be included?
  - Do we provide sufficient advice on how to find a new provider if you're not happy with your current provider?
  - *In the resource list:* are there other resources that should be included? Any that should be taken out?
  - Do you have suggestions for resources to include on adolescent confidentiality and services?

- 1:50 pm**                      **Next steps**
