Essential Sexual Health Questions to Ask Adults

Ask all of your adult patients the questions on this card to start the conversation and to begin taking a thorough sexual history. For more questions to assess risk, see Table 1 of “Sexual Health and Your Patients: A Provider’s Guide.”

1. What do you consider yourself to be?
   A. Lesbian, gay, or homosexual
   B. Straight or heterosexual
   C. Bisexual
   D. Another (please specify)
   E. Don’t know

2. What is your current gender identity?
   A. Male
   B. Female
   C. Transgender man
   D. Transgender woman
   E. Neither exclusively male nor female (e.g. non-binary or nonconforming)
   F. Another (please specify)
   G. Decline to answer

3. What sex were you assigned at birth?
   A. Male
   B. Female
   C. Decline to answer

Has sex changed for you? If so, how?

Ask Older Adults

Ask at Least Annually

Have you been sexually active in the last year?

→ What types of sex do you have (oral, vaginal, anal)?
   → With men, women, or both?

→ In the past 12 months, how many sexual partners have you had?

Have you ever been sexually active?

→ What types of sex did you have (oral, vaginal, anal)?
   → With men, women, or both?

Continue with medical history.

Gender identity and sexual orientation can be fluid.

Ask at least once, and update as needed.

Has sex changed for you? If so, how?

Essential Sexual Health Questions to Ask Adolescents

Ask all your adolescent patients the sexual health questions on this card. This will help you assess your patient’s level of sexual risk and determine which additional questions to ask and which preventive services are needed (other side of card).

<table>
<thead>
<tr>
<th>Ask at Least Annually</th>
<th>If the Adolescent Has Had Sex, Ask About</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. What questions do you have about your body and/or sex?</td>
<td>✓ Number of lifetime partners</td>
</tr>
<tr>
<td>2. Your body changes a lot during adolescence, and although this is normal, it can also be confusing. Some of my patients feel as though they’re more of a boy or a girl, or even something else, while their body changes in another way. How has this been for you?</td>
<td>✓ Number of partners in the past year</td>
</tr>
<tr>
<td>3. Some patients your age are exploring new relationships. Who do you find yourself attracted to? (Or, you could ask, “How would you describe your sexual orientation?”)</td>
<td>✓ The gender of those partners</td>
</tr>
<tr>
<td>4. Have you ever had sex with someone? By “sex,” I mean vaginal, oral, or anal sex. (If sexual activity has already been established, ask about sex in the past year.)</td>
<td>✓ The types of sex (vaginal, oral, anal)</td>
</tr>
<tr>
<td></td>
<td>✓ Use of protection (condoms and contraception)</td>
</tr>
<tr>
<td></td>
<td>✓ Coercion, rape, statutory rape, and incest</td>
</tr>
</tbody>
</table>

Prepare for the Sexual History Interview

✓ Explain to a parent or caregiver that you spend a portion of each visit alone with the adolescent.
✓ Put your patient at ease. Ensure confidentiality except if the adolescent intends to inflict harm or reports being abused. Know your state’s laws that affect minor consent and patient confidentiality.
✓ Incorporate the four essential sexual health questions into a broader psychosocial history.
✓ Start with less threatening topics, such as school or activities, before progressing to more sensitive topics, such as drugs and sexuality.
✓ Use open-ended questions, rather than closed-ended, to better facilitate conversation.
✓ Listen for strengths and positive behaviors and for opportunities to give praise where praise is due.

</tbody>
</table>

**If the Adolescent Identifies as Lesbian, Gay, Bisexual, Transgender, Questioning (LGBTQ)**

- ✓ Ask whether they have a trusted adult to talk to.
- ✓ Assess safety at home and school and whether they are being bullied or harassed.
- ✓ Link your patient to community or national organizations such as [pflag.org](http://pflag.org) or [thetrevorproject.org](http://thetrevorproject.org) for education and support.
- ✓ Counsel about using condoms and contraception. Adolescents who identify as lesbian or gay may also have sex with members of the opposite sex, which increases the risk for unintended pregnancy.
